

## Lab 9: Introduction to HTML Forms and CSS Basics

### Lab Tasks:

Make a webpage according to the diagram in the image below

Create an html webpage like the design and instructions mentioned below:

**Biodata** ← heading

Name:

reg No:

Username:

password:

Gender:   } drop down menu with two options

Courses: Computer Fundamentals ☐ ☐ } check boxes

Computer Fundamentals Lab ☐

Are the courses easy? ☐ } radio button

button that calls your JavaScript function  
When you press it should display all the data entered on the webpage below the form (Biodata Form)

Sample output:

Abdullah Hamid  
13PWCE111  
Abc  
123  
Male

"No need to display check boxes and radio output"

**NOTE:** Your page must have a background (color or image), also your page font should be courier, font color should be any color matching your background (not black default font color) and everything on the page should aligned to the center, all this should be done through CSS (internal only). Also you must use "CLASS SELECTORS" in CSS. This Lab task should be uploaded as an HTML FILE. The Picture(s) (if you have used any) should also be uploaded so that I could check it properly.
